AI ENGAGEMENT / TECHNICAL PROGRAM MANAGEMENT

AI Engineer with 7+ years of experience shipping production systems, with strong backend engineering fundamentals, scalable architecture, AI/LLM tooling, workflow automation, and technical delivery. Experienced in translating technical requirements into execution plans, coordinating stakeholders, supporting Agile delivery, managing technical debt, and communicating complex systems to technical and non-technical audiences. Strong fit for AI engagement environments requiring technical fluency, cross-functional alignment, delivery rigor, and continuous improvement.

CORE ALIGNMENT

AI & Technical Delivery: AI/LLM tools, agents, workflow automation, technical discovery, backend systems, scalable architecture, DevOps, cloud infrastructure, SDLC-oriented delivery

Engagement & Program Skills: requirements alignment, stakeholder management, product management, Agile development, technical workshops, delivery coordination, technical debt management, written/verbal communication

Cloud & Engineering: Python, Node.js, Ruby, Next.js, AWS, GCP, Stripe APIs/products

EXPERIENCE

Senior AI Engineer — TechCorp | 2020–Present

- Architected scalable, high-volume systems and integrated Stripe products/APIs into core business workflows, coordinating technical requirements and delivery dependencies.
- Built AI/LLM tools using Python, Node.js, Ruby, and Next.js while debugging production systems and managing technical debt across engineering workstreams.
- Led product-management initiatives for internal tools, aligning stakeholders on objectives, execution priorities, and delivery outcomes.
- Worked within Agile development practices across engineering pods, supporting iterative delivery and cross-functional coordination.
- Applied technical fluency across backend engineering, AI tooling, workflow automation, and cloud-oriented systems to communicate effectively with technical stakeholders.

Backend DevOps Engineer — InnovateTech | 2017–2020

- Built deployment pipelines and maintained cloud infrastructure using AWS and GCP, supporting reliable software delivery and operational execution.
- Delivered workflow-automation solutions for technical discovery and go-to-market teams, translating operational needs into technical workflows.
- Led technical workshops for non-engineering audiences, strengthening written and verbal communication and stakeholder alignment.

SELECTED PROJECTS

- **Stripe Payment Automation:** Built a Next.js/Node.js platform using Stripe products to automate billing workflows and integrate payments capabilities.
- **Enterprise Agent Platform:** Built an LLM-powered tool focused on technical debt management and cloud infrastructure cost optimization, connecting AI capabilities with operational outcomes.

EDUCATION

B.S. in Computer Science — State University

Target role: Instacart AI Engagement Manager. Resume language is aligned to the posted role without adding unverified certifications, tools, industries, or years of experience.
